

Legalize Nature

NEW BILLION-DOLLAR CROP

position with under-ground
fertilizer while the crop
grows. From the farmer's point
of view, hemp is an easy crop to
grow and will yield from three
to six tons per acre an acre and
that will grow even when the
soil is a short growing
season, so that it can be planted
after other crops are in. It
can be grown in any state of
the union. The long roots per-
sist and break the soil to
leave it in perfect condition for
the next year's crop. The same
kind of hemp, with its roots
feet above the ground, chokes
out weeds. Two successive
crops are enough to reclaim
land that has been abandoned
because of Canadian thistles or
other weeds.

Under old methods, hemp
costs to grow 1000

**American farmers are promised a new
high crop with an annual value of
several hundred million dollars, all but
which a machine has been invented which
solves a problem more than 4000 years old.
It is hemp, a crop that will not compete
with other domestic products, raised, it
will displace imports of raw material and
manufactured products produced by con-
sidered under and passed labor and it will
provide thousands of the for Americans.**

after the fiber has been removed contain
more than 90 percent pure oil cellu-
lose, and can be used to produce more than
2500 products, ranging from dynamite to
Cellophane.

It is grown now in service in Texas, Illi-
nois, Missouri and other states are pro-
ducing fiber of a manufacturing cost of half
a cent a pound, and are finding a profitable
market for the rest of the stalk. Machine
operators are making a good profit in con-
trast to the old.

The machine which makes
this possible is destined for
receiving the fiber being
taken from the rest of the
stalk, making hemp fiber avail-
able for use without a prob-
lem of any kind.

Hemp is the standard fiber
of the world. It has great ten-
sile strength and durability. It
is used to produce more than
4000 different products, ranging
from rope to fine linen, and
the world's "wonder" remaining

For further information, write to
Hemp, 1000 North 10th Street, Chicago, Ill.,
and you will receive a complete
description of the new crop and
the machine which makes it possible to
grow it.

It's High Time To Legalize Nature

by Silver Shield

I believe Silver and Cannabis have so much in common in their solution to cure humanity from the sickness that runs the world. It is my hope that silver stackers become more aware of Cannabis and for Cannabis lovers understand the solutions silver can provide with real tangible wealth outside the doomed banking system. ~ [TruthNeverTold](#)
