America Freedom to Fascism

Purchase full quality Director's cut DVD here: <http://www.freedomtofascism.com/downl...>

The true enemies of liberty and all modern societies and people are the central bank counterfeiters. The largest counterfeiter in the history of the world consists of the Federal Reserve banking scheme, which counterfeits American dollars through fiat currency and fractional reserve banking.

America Freedom to Fascism exposes the fraud and deceit of the Federal Reserve Banks (Fed), the Internal Revenue Service (IRS) and the 16th Amendment, the income tax, the Federal Reserve System, national ID cards (REAL ID Act), human-implanted RFID tags (Spychips), Diebold electronic voting machines, New World Order (globalization), Big Brother, taser weapons abuse, and the use of terrorism by government as a means to diminish the citizens' rights.

The Federal Reserve System is a privately held, for profit corporation, and not a government agency. It was created by bankers for bankers as a lender of last resort, so that whenever a banker ran his businesses poorly he could be bailed out at the expense of the public. The Fed does not have any reserves, it simply creates fiat money out of nothing and lends it out at interest to businesses and the federal government. The American people are then forced to pay for the bailouts to government and businesses through inflation and personal income taxes on their labor. The currency the Fed creates out of thin air and loans out to the government at interest is called Federal Reserve Notes - look at the top of what you may think are your Dollars and you will see they are actually Federal Reserve Notes (FRNs). FRNs are backed by nothing. US Dollars are required by law to be backed by gold and silver, but US Dollars are no longer in circulation. The only real US Dollars still somewhat in circulation are US Silver Eagles and Gold Eagle coins, but they have become so valuable due to the Fed's inflation and destruction of the FRN currency, that it takes thousands of FRNs just to buy a single US \$50 gold coin, and dozens of FRNs to buy a single US \$1 Dollar silver coin.

The Federal Reserve System operates through manipulation of interest rates, which results in expanding and retracting bubbles of inflation, referred to as business cycles. When the Fed inflates the currency, it is effectively a hidden tax on existing currency, because the value of the newly created currency is stolen from the value of existing currency. This is reflected in continually rising prices, even though advances in technology and manufacturing processes should result in lower prices and a higher standard of living for everyone. Since the creation of the Fed in 1913, it has debased 99% of the value of the Dollar. In other words, it now takes \$100 FRNs to buy what just \$1 US Dollar would buy in 1913, as a result of inflation due to the Fed counterfeiting so much currency. If you had saved \$100 in 1913, it would now only buy as much as a single 1913 Dollar would have bought at that time. The other \$99 of value would have been stolen through counterfeiting (cheaply duplicating money out of nothing) over the years, resulting in the value of the \$100 being taxed through inflation, behind your back.

The film explains how monetary policy is the most powerful form of control over people that has ever existed, and is central to the unconstitutional, global New World Order ambitions of those that own and benefit from the Fed. The founder of the Rothschild family international banking dynasty, which became the most successful business family in history, Mayer Amschel Rothschild once declared, "Give me control of a nation's money, and I care not who makes the laws."

Most Americans are kept ignorant of how the Federal Reserve operates through actions of corrupt politicians and an increasingly centralized media. Using terms like, 'quantitative easing,' 'monetizing the debt,' or 'adjusting monetary policy for increased fluidity of credit,' the Fed conceals its true actions behind veils of legitimacy.

The U.S. Congress has the duty and responsibility of coining and maintaining the value of our dollar and money, yet Congress is being negligent in overseeing the Fed, as many politicians depend upon large campaign contributions from the Federal Reserve system bankers. In 2008, Democrat Barack Obama's #1 campaign contributor was Goldman Sachs, among many other banks involved in the fraudulent Federal Reserve counterfeiting system. What is particularly important to note is that Republican John McCain's top contributors were the same as Barack Obama's.
